

15th March 2021

Dear Parent,

## **Lateral Flow Device (LFD) Home Testing Kits**

This letter outlines details of the LFD Home Testing Kits which are being issued to pupils starting the week commencing 15th March.

Regular asymptomatic (no symptoms) COVID-19 testing has been in place for all staff at schools and colleges since January.

[The Government has recently announced that](#) all secondary aged pupils and college students will be offered regular asymptomatic COVID-19 tests to take at home. All secondary aged pupils and Sixth Form students will be offered tests to take at home twice a week, so that we can reduce the spread of the virus. These tests should be taken during term time and also during the holidays until further notice.

Details of how parents of Senior School and Sixth Form age can receive tests are found in the link above.

Up to one in three people who have COVID-19 can spread the virus without knowing. This is because they have no symptoms. To reduce the spread of the virus, we need to identify those individuals. We can help to do this by carrying out tests at home twice every week.

### **Testing pupils/students at home**

Taking part in testing is voluntary and all pupils and students will be able to attend school whether they take part or not. We hope that the option to take the test in the morning **or** the evening will support families to test at home.

Tests kits will be collected from school and are free of charge. Pupils will receive a pack of 3 tests in one box, with a leaflet on how to take the test and report the results.

The result of each test needs to be reported using the NHS Test & Trace self-report website: <https://www.gov.uk/report-covid19-result>. Pupils will also need to tell the school the result of each test using the app on the pupil landing page of SharePoint, which will become live on Sunday 21st March.

If the result of the LFD test is unclear (void) pupils will need to do another one.

If a pupil has a positive test result, they will need to stay at home and self-isolate. Pupils should then book a confirmatory Polymerase Chain Reaction (PCR) test after which they can return to school upon a negative result or after the appropriate period of self-isolation.

### **Taking part**

Taking part in testing is voluntary and all pupils will be able to attend school whether they take part in testing or not.

I am strongly encouraging all pupils to take part in the national testing programme.

Please contact me, if you have any questions or concerns about home testing.

Thank you for your support.

*A. Dennis*

## Some frequently asked questions

### **What type of tests will be used?**

We will be sending home Lateral Flow Device (LFD) tests. They are a fast and simple way to test people who do not have symptoms of COVID-19, but who may still be spreading the virus.

The tests are easy to use and give results in 30 minutes.

Further information: <https://www.gov.uk/guidance/understanding-lateral-flow-antigen-testing-for-people-without-symptoms>

### **Are LFD tests accurate?**

Lateral Flow Devices identify people who are likely to be infectious. These individuals tend to spread the virus to many people and so identifying them through this test is important.

These tests have been widely and successfully used to detect COVID-19 in asymptomatic individuals and are approved by the Medicines and Healthcare products Regulatory Agency (MHRA). The speed and convenience of the tests supports the detection of the virus in asymptomatic individuals, who would not otherwise have got tested.

The tests are highly specific, with low chance of false positives. They are also very sensitive and are able to identify the majority of the most infectious yet asymptomatic individuals. Extensive evaluation has been carried out on the tests and it shows that they are both accurate and sensitive enough to be used in the community for screening and surveillance purposes.

It is important to remember that these tests are only an aid to help stop the spread of the virus and you should continue to follow other guidance such as on wearing face coverings and social distancing.

### **How are LFD tests different to PCR tests?**

There are 2 main types of test to check if you have coronavirus:

- polymerase chain reaction (PCR) tests check for the genetic material (RNA) of the virus in the sample - you send the sample for processing at a lab;
- lateral flow device (LFD) tests detect proteins called 'antigens' produced by the virus - LFD tests give rapid results, in 30 minutes after taking the test.

### **How will personal information and test results be shared?**

When pupils take a Lateral Flow test, they need to report the result. This is so that their test result can be traced, which means that they need to share some information about themselves. The methods for reporting this are in the Information for Use booklet issued with the tests.

They will need to tell the Department for Health and Social Care (DHSC):

- child's name
- child's test result
- the reference number on the test Kit

They will also need to tell the school or college their test result.

Under UK law, a child's school or college can collect and store test result data because it is in the 'public interest'.

Schools and colleges will only share information with the Department of Health and Social Care (DHSC) if the test kits used are found to be faulty. If this happens, DHSC will use our information to contact people who used the faulty tests, so that they can be tested again.

When someone reports test results online, they are sharing information with DHSC. DHSC may share the information with your GP, local government, NHS, and Public Health England. This is so that they can offer health services and guidance if someone needs to self-isolate. They might also use data anonymously (a person's name or contact information) to research COVID-19, and improve our understanding of the virus.

For more information on how personal data is used for testing please see the detailed privacy notice on the school's website in About Us, Covid-19.

### **What if a child cannot tolerate a swab down their throat, perhaps due to their disability?**

A child or young person may find it difficult to take a throat swab due, for example, to their having difficulty in understanding instructions, needing to keep their mouth open during the period of swabbing or they are having a strong gag reflex. In such cases, where a combined nose and throat swab is not possible, a nose swab from both nostrils can be taken. Similarly, if a nasal swab is not feasible, a throat swab alone will suffice.

[Help and support is available](#) for students, parents and carers, including instructions in different languages on how to test and report the results and a video showing you how to take the test.
